CONVERTIBLE SUNPORCH®

THE WINTER SUNROOM THAT CONVERTS TO A SUMMER SCREEN ROOM
Presenting the SunPorch® convertible sunroom.

It can brighten your life in winter.
As a sitting room, eating area, leisure space, exercise room, or spa/hot tub enclosure.
Or as a solar greenhouse that grows fresh vegetables, pretty flowers.

It converts to a bug-free screen room in summer.
It’s America’s first and only convertible sunroom.

It can help heat your home.
As an entryway, foyer, wind-break, solar heat collector.

And it’s very affordable.
Finally, a true solar panel sunroom that’s low-cost, shatter-resistant and energy saving.
You can install it yourself, with no contractors and no special footings.
Today's the day to have the convertible sunroom you always wanted someday.

The SunPorch makes the dream of a warm winter sunroom and a breezy summer screen room possible, practical, irresistible.

Whatever your dream, it's now a reality.
NO OTHER SUNROOM CAN DO THIS. . . THIS EASILY!

With our exclusive patented QWIK® window fastening system, it’s a **snap** to convert the SunPorch from a warm, insulated sunroom into a breezy bug-free screen room.

**REMOVES IN SECONDS.**
To remove panel, simply flip latches upward. The lightweight 7 lb. panel unlocks, and lifts out easily, giving you a large 3’ x 3’ screened opening.

**REPLACES IN SECONDS.**
To re-lock panel, set the bottoms into the frame, tilt top into opening, and simply flip latches downward.

**IT’S QUICK, IT’S SIMPLE, IT’S UNIQUE!**
And it’s all done from inside the SunPorch structure!

**LOWER SELF-STORING SYSTEM PROVIDED FOR UPPER PANELS**
NO OTHER SUNROOM OFFERS THESE FEATURES TO ENHANCE YOUR YEAR-ROUND PLEASURE.

OUTSIDE SUMMER SHADE AND HOW IT WORKS

INSIDE WINTER SOLAR BLANKET AND HOW IT WORKS

DAYTIME: ALLOWS LIGHT TRANSMISSION
NIGHTTIME: REFLECTS HEAT INWARDS

SUMMER MODE SHADES OUTSIDE

WINTER MODE BLANKETS INSIDE

EXTERIOR SUMMER REFLECTIVE SHADES BLOCKOUT SUNLIGHT BY 98% TO KEEP YOU NICE AND COOL.

The SunPorch shade system is the most effective type of shading available in the industry today as it blocks the summer sun and heat on the outside of the structure.

Each 3’ x 3’ shade has a reflective aluminum surface, locked in an aluminum frame. They hook together and slip in and out of the roof tracks provided.

INTERIOR WINTER REFLECTIVE SOLAR BLANKETS PROVIDE ENERGY SAVINGS OF 60%.

This unique system offers significant winter heating savings. It also allows transmission of bright sunlight to create a healthy environment.

Each blanket is a 3’ x 3’ aluminum framed polyester and aluminum fabric, that mounts to the horizontal frame members inside the SunPorch.
Choose from four SunPorch® models with QWIK® window convertibility.

The Deluxe model, in double or single pane styles, converts to a full-height screen room. All upper and lower panels (including the door) are convertible.

The Value model, also in double or single pane styles, converts to a partial screen room. Upper panels are convertible, while the lower panels are fixed.

See Booklet “How to choose the SunPorch that’s right for you.” You’ll find details on the complete line of SunPorch models.
Because We Know Who Our Customers Are, We Know What Our Customers Want.

Most manufacturers build merchandise they can sell to stores, so they know what the stores want. We build our sunrooms to sell directly to our customers, so we know what our customers want. And that’s why the SunPorch is designed to be:

- A quality, long-lasting sunroom. An ideal incidental living space at a very affordable price.

- A complete do-it-yourself structure, with no contractors needed and it mounts readily on most existing surfaces.

- Fully light-transmitting through every surface, top, front, and sides, all year ’round.

- Convertible from a winter sunroom to a partial or full-height screen room.

- Affordable, with direct-from-the-factory prices and a full range of models for every budget.

You’ll also get direct-from-the-factory service, every time you call, even years after you buy. Only SunPorch brings you these kind of features, these kind of prices, and this kind of service.

Because…

**NOTHING COMES BETWEEN US AND OUR CUSTOMERS.**
The glazing in a SunPorch is beautiful, energy-efficient and virtually indestructible. It can even stand up to earthquakes! So you don’t have to worry about little things like wind storms, hail storms, ice storms, blizzards, falling branches, accidents or vandals. You don’t have to worry about children either; the SunPorch is completely safe for them.

The roof is made of the same material used for bullet-proof bank teller windows. The walls are 40 times more impact resistant than glass. No wonder we have a 10 year warranty.

Our structures are totally tried and proven in all environments. Our structure and panels have been utilized in thousands of roof, wall, solar, greenhouse and living applications. Which is why you won’t find a sunroom with this many features and this long a warranty: 10 years on all materials and on the total house structure.

### THE THERMAL ROOF

**GENERAL ELECTRIC LEXAN® POLYCARBONATE**

- 200 Times the Impact Strength of Glass With 1/8 of the Weight
- INSULATING AIR SPACE
- Ultra Violet Ray Resistant Outer Surface With 10 Year Warranty Against Yellowing, Aging & Hailstones

- Seamless, leak-resistant 3' wide sections extend from top ridge to front eave.
- Light-diffusing, ideal for growing, no hot spots or shadows.
- Meets or exceeds building codes.
- Physical Properties:
  - U-Value - .59 (With Winter Blanket .28)
  - R-Value - 1.63 (With Winter Blanket 3.57)
  - Light Transmission - Clear 82%, Bronze 50% With Sunshades - Clear 20%, Bronze 13%

### THE THERMAL WALLS

**DURAPLEX™ GLASS CLEAR HI-IMPACT ACRYLIC**

- Inner & Outer Shatter-Resistant Panels
- INSULATING AIR SPACE
- Ultra Violet Ray Resistant Against Yellowing, Aging or Loss of Light
- Permanently Bonded to a Rigid Aluminum Support Frame

- Lightweight QWIK® change wall panels weight just 8 lbs. for a 3' x 3' panel.
- Outstanding Optical Quality.
- Meets or exceeds building codes.
- Physical Properties:
  - U-Value - .50 R-Value - 2.0 (Applies to Double Pane Models)
  - Light Transmission - Clear 86%, Bronze 34%

**WITH THE DELUXE MODEL, CHOOSE CLEAR GLAZING OR BRONZE-TINT GLAZING AT NO EXTRA CHARGE.**

**HINTS ON WHICH TO CHOOSE:**

If you desire privacy (for a hot tub enclosure, for instance) the bronze tint may be ideal. While it reduces light transmission to about 34%, it does not affect heat transmission.

If you will be using your SunPorch for growing, or if you desire the full therapeutic benefits of sunlight, choose the clear glazing. Reduced light transmission will result in malformed plants. In Northern U.S. areas, clear glazing helps maximize periods of sunlight, especially during the winter when it gets darker earlier.
The SunPorch® gives you all these additional features. All at a price you won’t believe.

**MANUAL VENTS ARE STANDARD IN EACH SECTION OF EVERY DELUXE SUNPORCH**

*No other sunspace has this standard feature!* To make the SunPorch truly comfortable in warm summer months, there’s a built-in positive exhaust system. Every “Convertible” comes with a screened vent opening in each section, operable by pole from the inside. Since hot air rises naturally, it’s vented right through the roof. It’s just another way the SunPorch is engineered for your year-round enjoyment!

**EASIEST DO-IT-YOURSELF ASSEMBLY OF ANY SUNROOM KIT**

It takes no experience and only a few tools. (Or hire an inexpensive handyman if you’d rather not bother.)

**MORE FREE SOLAR ENERGY**

With an outside temperature of 20 degrees, it takes just a brief period of sunlight to raise the sunroom temperature to a balmy 80 degrees *with no heater of any kind*. The double-pane thermal walls capture the sun’s heat more quickly, and retain it longer.

**HEAVY-DUTY ALUMINUM RAFTERS MEET BUILDING CODES**

A long-lasting sunroom needs a substantial, long-lasting frame structure. And for wind and snow loads, that’s what we have. The hollow extruded beams come in your choice of Bronze or White, with a factory-baked enamel finish, warranted against pitting or peeling. These sturdy beams conform to nationally recognized BOCA, ICBO, and SBCCI codes for wind and snow loads.

**FLEXIBLE FRONT OR END WALL DOOR POSITION**

The large storm/screen combination door with QWIK® window panels may be placed in any front or end wall area. We’ve also engineered the door to give you a choice of right or left hand hinges, with an outward swing to save space and meet Codes.

**RAIN-GARD WATER DIVERSERS**

These full–length, front–eave diverters move water away from front wall areas, a nice feature when screen are in place during the summer. They come standard with all models.

**10 YEAR LIMITED OWNERSHIP WARRANTY**

Applies to every material used in the SunPorch: the heavy, rust-proof frame, the double-pane thermal walls, the special matching bronze or white stainless steel screws. THE SUNPORCH CARRIES THE STRONGEST WARRANTY IN THE SUNROOM INDUSTRY.

QUESTIONS? 800-221-2550… www.sunporch.com

**Governing Law**

The SunPorch Structures ten (10) year limited warranty shall be governed by the laws of the State of Connecticut. Any claim under the warranty to arbitration, shall be a complete defense to the institution or further prosecution of any other legal proceeding.

**What is Not Covered**

- What is Covered
  - Applies to every material used in the SunPorch: the heavy, rust-proof frame, the double-pane thermal walls, the special matching bronze or white stainless steel screws. THE SUNPORCH CARRIES THE STRONGEST WARRANTY IN THE SUNROOM INDUSTRY.

**TEN YEAR LIMITED WARRANTY**

Let our owners show you just some of the ways you can use the SunPorch®.

Note: SunPorch owners are so proud of their sun spaces, they supplied all the pictures used in this catalogue.
Light, bright, airy, and so very comfortable, our 9’ W x 15’ L SunPorch has become the most used room of the house. Truly functional, it’s everything we need in just a 9’ W x 12’ L size. (P.S., the shelves came from Home Depot…)

Perched high on the second story of our mountain top home, we enjoy a truly magnificent view of the countryside.

The addition worked nicely with a knee wall, drop-door, and corner mount.

We just love our SunPorch. This Nova Scotia addition features a ceramic tile floor and a door for “Sparky”.

Our neat and complete garden room is mounted on landscape ties, with crushed stone floor. We have added baseboard heating, a cross-air cooling system, adjustable wire shelves, and a sink and potting table. Truly functional, it’s everything we need in just a 9’ W x 12’ L size. (P.S., the shelves came from Home Depot…)

Catalog 2001
Page 11 of 20 Pages
Here’s everything you need to install your SunPorch® on your existing deck, patio, or landscape ties.

THE PLANS

Although the SunPorch was designed from the very beginning for assembly without contractors or handymen, it does require a certain amount of do-it-yourself skills. The plans are clear and user-friendly, and a two-person team of moderate ability can usually assemble a SunPorch over two or three days. However, if you’re not confident in your skills, a small investment in experienced workmen can insure a perfect installation.

THE TOOLS

Ready for the list? Well, here it is... in pictures. They’re all easily recognized items, the kind most homeowners already have for simple do-it-yourself chores around the house. And anything you don’t have will be available at any hardware store.

THE TIME

Exactly how long it will take kind of depends on you. Early preparation procedures such as sorting the parts, gasketing, and the removal of protective part covers can reduce the final assembly time dramatically. Parts are light weight, so age or strength is not a factor. So how long? Well, it’s likely that a 9' x 12' can be assembled over a weekend. But whatever the time period, you’ll find it to be a labor of love, and an extremely satisfying experience.
And here’s everything you don’t need!

**YOU DON’T NEED A CONTRACTOR**
The SunPorch design begins to eliminate costs even before you get started. Because you don’t have to hire an expensive contractor just to wield a screwdriver and drill, read the easy-to-follow instructions, and do the assembly. With a little help and a moderate amount of skill, you can do it yourself. Or get a relatively inexpensive handyman or two to do it for you.

**YOU DON’T NEED AN ELABORATE HEATING SYSTEM**
Our double-wall thermal panels insulate the SunPorch from the harsh winter cold in amazing fashion. With an outside temperature of 20°, it takes just a brief period of sunlight to warm the structure to a balmy 80° or 90°—with no heater of any kind.

And with the addition of our unique winter solar blanket roof system, you have the most energy-efficient structure available.

**YOU DON’T NEED A FOUNDATION**
One of the great beauties of the SunPorch is that it is a living, breathing, flexible structure. Our glazing, unlike rigid glass, is all shatter-resistant, with genuine rubber gasketry to absorb any and all movements.

That is why it can mount easily to your existing wood deck, second story balcony or some inexpensive landscape ties.

**YOU DON’T NEED TO WORRY ABOUT MAINTENANCE**
The SunPorch is a maintenance-free structure. The basic components of aluminum, stainless steel, and shatter-resistant glazing are all backed by a 10-year limited warranty on the total structure.

**WHAT YOU DON’T NEED CAN SAVE YOU MANY THOUSANDS OF DOLLARS!**

QUESTIONS? 800-221-2550… www.sunporch.com
WHO SAYS THIS IS THE BEST SUNROOM VALUE TODAY?

THE PEOPLE WHO OWN ONE!

(Actual Statements From Warranty Registration Cards.)

“T
his has become my favorite room in the house. I’m more than satisfied with its versatility and beauty. Saturday A.M. brunches are heavenly...relaxing in the sunroom. Thank you for a workable design at an affordable price.”

Ms. J.C., 41, Willits, CA.

“This is one of the best constructed sunrooms I have seen. It’s a very nice looking piece on my deck. I love it.”

Ms. J.B., over 40, Latham, NY.

“It’s well made...excellent materials, excellent packaging, quality hardware, excellent instructions and parts identification.”

Dr. A.B., 63, Trevett, ME.

“The ad does not do justice to your product. It’s the best made, most beautiful structure of this type I have seen.”

Mr. J.B., 41, Sterling, VA.

“It’s the best home improvement ever made. We recommend it to everyone.”

Mr. T.K., 49, Springfield, VA.

“SunPorch a great success. Just what we wanted—extra room, sunny, pleasant, warm air!”

Mr. A.M., 62, Berlin, MA.

“We love it and it adds value to our home.”

Mr. A.D., 63, Norwalk, OH.

“The greenhouse went together very nicely. It holds a nighttime 50° in spite of teens outside.”

Ms. S.B., Boulder, WY.
The SunPorch® does so much for so many kinds of people.

THE ONLY GREENHOUSE TO BE OFFICIALLY ENDORSED BY THE AMERICAN HORTICULTURAL THERAPY ASSOCIATION

Horticultural therapy is a recognized profession that continues to grow as a treatment alternative with wide-ranging benefits for people with special needs. As a result of that growth, the demand for trained horticultural therapists has steadily increased, prompting universities to offer degree programs in the field. The American Horticultural Therapy Association (AHTA), established as a professional organization in 1973, offers workshops and training seminars to benefit its membership.

In addition, horticultural therapy outreach programs serve older adults, disadvantaged children, and families-at-risk. These efforts emphasize health and wellness and teach vocational skills, which can lead to gainful employment in the horticulture industry.

Catalog 2001
Page 15 of 20 Pages
About SunPorch® Structures.

Founded in 1974 as the Vegetable Factory, the company’s statement of purpose is still very much in effect today. It was, and is, as follows:

“Make it a do-it-yourself kit, easy to assemble.”
So we designed a lightweight structure that mom and pop can handle.

“Make it a lifetime, maintenance-free structure.”
So we used a sturdy, aluminum frame and stainless steel hardware to last a lifetime.

“Make it ready to mount on an existing deck.”
So we used shatter-resistant glazing, with no expensive foundations needed.

“Make it energy-efficient, for year ’round use.”
So we invented America’s first insulated, double-wall greenhouse.

“Make it low cost, a real bargain.”
So we sell it only by mail, avoiding dealer profits and interstate taxes.

1974
America’s first double-wall greenhouse designed to grow food.

1986
America’s first convertible sunroom with panels and screens.

1990
Improved SunPorch with Qwik® windows in upper level only.

THE INNOVATIONS CONTINUE, WITH CONVERTIBILITY ON TOP, ON BOTTOM, OR BOTH... INCLUDING THE DOOR AREAS!
WHERE ELSE CAN YOU GET ALL THIS?

If you’re wondering why you should buy a SunPorch from us, instead of another sunroom from a retail store, here are some very good reasons.

PRICE
By buying direct from the factory, you avoid paying for dealer profits, showroom costs, and other expenses we simply don’t have. In addition, you’ll save hundreds of dollars in sales tax outside of Connecticut.

INNOVATION
From the very beginning, we’ve always strived to be the first with remarkable new ideas. Our latest advances, like even easier convertibility, and our optional climate control system, keep us light years ahead of our competition.

SHIPPING MADE EASY
To alleviate any concerns you may have, we use time-tested shipping procedures and trusted shippers. When your SunPorch leaves the factory, we air express to you all the data you need to arrange delivery. And if damage does occur, we replace the part and handle the claim for you yourselves. No hassle for you.

QUALITY CONTROL
Our wholly-owned manufacturing facility is especially concerned with detail. To this end, we use the finest in precision tools, dies, and machinery to produce parts that are perfect fits. Your on-site assembly will be a smooth and pleasant experience.

YOU COME FIRST
We’ve had a long-standing policy of putting our customers’ needs first. There are no special rewards, incentives, or commissions to get our Customer Service people to try to sell you anything but the SunPorch that exactly suits your needs.

LIFETIME SUPPORT
As long as you own a SunPorch, you can call us toll-free should you encounter any problems or have any questions. This is apart from our warranty on the total structure. As a concerned company, we still stock and replace parts for structures over 20 years old.

YOU SIMPLY CAN’T GET ALL THIS ANYWHERE ELSE!

QUESTIONS? 800-221-2550... www.sunporch.com
1. **Can I buy roof or wall glazing parts only?**
   
   **THE ANSWER IS NO.**
   
   For some very good reasons. The SunPorch is engineered to be assembled and attached as a total product. The use of glazing on an incompatible framework system can cause parts failure, leakage, and possible structure collapse. So our policy is to sell the total product only.

2. **What make the SunPorch so different than other patio rooms?**
   
   The SunPorch has a full light-emitting roof structure. There are no solid areas to darken adjacent rooms. Unlike sliders, the wall areas are fully screened from top to bottom to provide maximum air circulation. These, plus many other exclusive features are not available by any other maker.

3. **Can I safely mount the structure on a deck, patio, or landscape ties?**
   
   Yes. Even in the coldest weather, the movement of our living, breathing structure is minimal. The shatter-resistant glazing readily accepts such movement, and our QWIK window system is designed to maintain a tight seal throughout. Unlike glass houses, a concrete footing to the frost line, which may be costly, is not necessary.

4. **How do I attach the SunPorch to my house?**
   
   Our assembly plan carefully details the procedure. As home surfaces vary, our engineers suggest that vertical 2 x 4’s plus a header be attached to the wall to provide a smooth surface for our aluminum framework. You then can add caulking or weather stripping for a snug, air-tight fit.

5. **How long will my SunPorch last?**
   
   The aluminum framework and stainless steel hardware have an obvious lifetime durability. And because we use specially-formulated, high quality glazing resins, our glazing materials are designed to provide equally excellent trouble-free performance for many years. In fact, our total structure carries a limited 10 year warranty. We believe it will last a lifetime as it is virtually indestructible, and warranteed hailproof. It illustrates the kind of real long-term value we offer.

6. **Does your sunroom pass architectural and building codes?**
   
   Yes. The structure is made of 6063-T6 aluminum alloy and is designed to meet or exceed BOCA, ICBO and SBCCI Codes for Greenhouse Wind and Snow Loads. The glazing materials, tested by the American Society for Testing Materials (ASTM), also meet all codes for strength and flammability. Engineering data is available. In addition to meeting building codes, the SunPorch meets or exceeds AAMA 101-93 tests for air and water infiltration.

7. **Are building permits necessary, and will it be assessed?**
   
   The rules for incidental structures, like greenhouses, that can be assembled and disassembled when you move, vary from state to state. And often to individual communities. Many areas have ruled that if your pad or deck is already on an approved lot plan, further permits should not be necessary. As we do meet building codes, it’s always best to check with your local town hall for any required permits and possible assessment. Engineering data is available to assist you.

8. **In selecting any sunroom, how can I be sure that I am getting the best value for my money?**
   
   Very simply. First, determine your needs. If you desire an addition that provides “incidental” living space, along with gardening and/or solar heating, or a spa enclosure, or a garden sitting/eating area, or a combination, we are an outstanding value. If you desire “primary” living space, construction needs to be designed to the same standards as your home. So be prepared to spend from 3 to 5 times the price of a SunPorch. Your needs should determine your choice.

9. **How long do I have to wait for delivery? Can I order now and reserve delivery for a later date?**
   
   Generally speaking, most orders are shipped within 2-3 weeks. Custom structures take a bit longer. Under our price-protection plan, a $100 deposit (fully refundable) will hold your order for up to 90 days, or longer upon special request.
Your new SunPorch® is waiting! design it yourself… right now!

The enclosed cream-colored, 16-page booklet, “How to choose the SunPorch that’s right for you,” will take you through the steps of designing your SunPorch. You’ll get help in measuring, selecting a SunPorch model, and choosing options. When you’re done, you’ll not only have designed your own SunPorch, you’ll know exactly what it will cost! And of course, if you need any further assistance, just give us a call.

So look through that cream-colored booklet right now. After all, every minute you delay is a minute you could have to enjoy your new year-round sunroom!

“**A FAR BETTER WAY TO SELL A PRODUCT IS TO MAKE YOUR PRODUCT FAR BETTER.**”
SunPorch® quality has been tried, tested, and proven. Don’t settle for anything less!

STRUCTURES MEET OR EXCEED BUILDING CODES

- **LIVE SNOW LOADS** (BOCA, ICBO, SBCC)
  - 30 TO 45 LBS. PER SQ. FT.

- **WIND LOADS** (BOCA, ICBO, SBCCI)
  - 90 MILES PER HOUR.

- **EARTHQUAKES**
  - MEET CALIFORNIA 1997 ICBO CODE
  - FOR EARTHQUAKES AND LATERAL FORCES

DOUBLE PANES WINDOWS MEET OR EXCEED AAMA 101-93 TESTS

- **PASSES AIR INFILTRATION TEST**
- **PASSES WATER RESISTANCE TEST**
- **PASSES STRUCTURAL PRESSURE TEST**

Plus a 10 year limited warranty on the total structure!
